OUR PROJECT

- Our project is a website made for student designers that are looking for a space to begin documenting their work.
- Users can create an account to upload their work and create portfolio pages for others to view like firms and future employers.
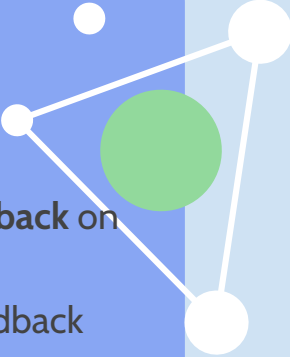

Link to repo:
https://github.com/Ang-909/Profolio-website-Degigner-s-Archives-.git

The features included are:

Login Page
Resume and Portfolio Page
About us page
Contact Page
Feedback Page

Feedback

- Feedback from Midterm
  - Was asked to i**mprove profile page** and create a page where users can send **feedback** on things they wish we could improve
  - With this **feedback** we made the profile page more **interactive** and created a feedback page to allow people to voice their concerns.
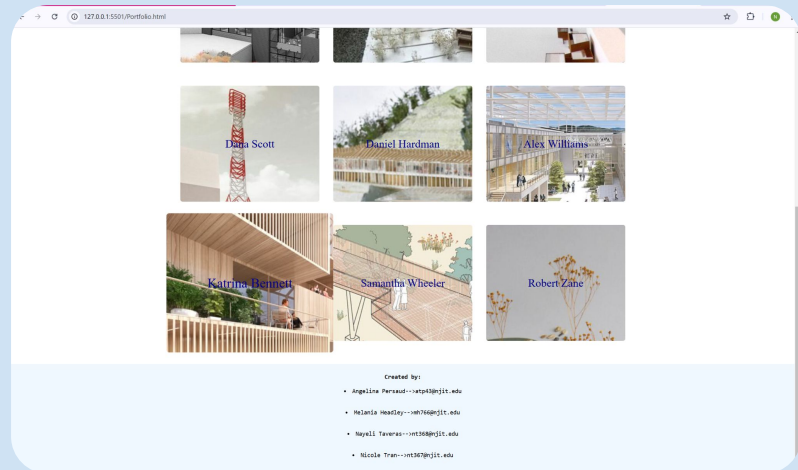

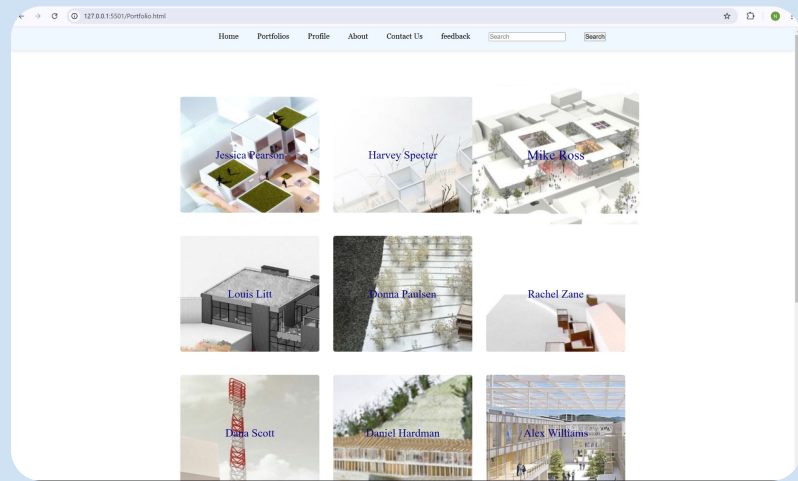

Challenges

- Creating a interactive pages
- Implementing java script that worked properly
- Keeping the repository updated
- Placing divs in the correct position without overlapping
- Formatting the footer to automatically fit to the screen size
- Adding details

Send us your Feedback!!
Thank you for taking the time to complete this short questionnaire about our website! Answer as many questions as you can, and please don't hesitate to go into detail!
What is your major?
[Choose your Major here ▾]
Would you use a platform that helps designers like architects, interior designers, and digital designers, etc. showcase their resume and work? It would also help you get connected with firms and future employers, as they would be able to view your profile and show interest.
[Select ▾]
What would you like to see included in this platform? EX: internship opportunities, messages/email space to contact employers, templates, etc.
[Please Type Here]

[Submit]

Lessons learned

- When implementing different sections on a page it is important to put them in different divs to create a better flowing page with css

- It's important to look over you code for spelling error when the code is not working
- Because all of the pages are linked to each other, it's important to ensure that every page is updated with new information and linked correctly.

What did we do?

Angelina

- Html for home page
- Profile Page
- Added to Css

Melania

- Added to CS
- Made mock-up pages
- Feedback Page

Designer's Archive

Nayeli

text

Nicole

- Basic HTML pages
- Basic CSS codes for all pages and more specifically for the portfolio and homepage
- Documentation
